

# Plant Watering Foresight

*The Plant Life Saver  
and Water Saver!*

# Let The Weather Water Your Plants For You

## → Water Conservation

- If it is going to rain throughout the week, you don't have to water your plants at all or can do so at a lesser amount
- Knowing that you don't have to spend the time and water to watering your plants (garden and trees) for that week saves you that time and water

# Let The Weather Water Your Plants For You

- Knowing how many millimeters in total precipitation will rain that week is how you can plan on skipping or resuming your plant watering schedule
- By utilizing the weather forecast, the total precipitation in a week is possible to use in relation to the type of plant that needs different watering frequencies
